EXPERIENCE THE ULTIMATE

ENGINEERED FOR ULTIMATE CONTROL

# PLATINUM ELITE™

PLATINUM ELITE™

# EXPERIENCE THE ULTIMATE

## UNMATCHED PERFORMANCE

Artesian Spas' Platinum Elite models are indeed beautiful, but they are far more than just aesthetically pleasing. Behind the graceful lines and pampering surfaces lies the most powerful, sophisticated system ever devised for moving and controlling the flow of water in a spa. This personalized water control system is what truly sets this spa line apart from the rest. The Platinum Elite spa moves more water volume through more jets with greater power and less resistance than any other spa in the industry. Our patented Helix Jet System produces a powerful rotating, pulsing action, giving you a soothing, luxurious hydro-massage unlike any other. Simply stated, you will not find a better performing, more therapeutic spa anywhere else in the world.

**BEST OF CLASS**

[poolandspa.com](http://poolandspa.com)

# SMART DESIGN

## ENERGY-EFFICIENT

### WhisperPure Circulation System

Artesian Spas' E-Series circulation system redefines circulation pump performance in the spa industry. This revolutionary system filters 30 gallons per minute, which means that the spa water is filtered and ozone sanitized more than 100 times a day. The pump has no shaft or seals to perish, so the end result is a durable, leak-proof system that is whisper-quiet as well as cost-efficient. This circulation system operates at a lower cost than any other system available today.

### Switchless Motors

The smaller and more energy-efficient, switchless motor used in Platinum Elite Class spas delivers maximum performance and is virtually trouble-free. This long-lasting motor does not require a mechanical switch to take it from "start" to "run", which greatly increases its efficiency. It is quieter than larger conventional motors and requires fewer operating parts, which reduces the potential for problems and increases its life.

## HELIX-INSPIRED: A NEW SPIN ON SPA JETS

The Platinum Elite line features a revolutionary breakthrough in hydrotherapy jetting that makes use of the timeless concept of the helix; a curve in three-dimensional space, such as that found in a spiral staircase. This Artesian Spas-patented jet design provides a truly remarkable hydro-massage. Engineered with the idea of the double helix in mind, the jets use a right-directional spiral on the inside of the cylinder. This causes water to spiral out in a twisting motion, providing jet pulsation and heightened massage pressure.

The two largest helix jets, named **ProHelix™**, provide a high volume of water to massage large muscles in the body. The midsized helix jet, called **TheraHelix™**, is strategically placed in the spa in small groups to massage muscles such as the calves, hamstrings, deltoids, biceps, and triceps.

The smallest helix jet, the **AccuHelix™**, is placed in large groupings to massage larger regions of the body, such as the entire back. As a complete system, four to five different sizes of helix jets are featured in every Platinum Elite Spa model.

# DIRECTFLOW™

## PERSONAL CONTROL FOR EVERY SEAT

Custom Massage Seat | More Efficient | Reduces Operation Cost

The innovative patented DIRECTFLOW™ switchless motor and direct plumbing system combined with the VARIABLE FLOW CONTROL (VFC), provides each user with the ultimate individual control and hydrotherapy experience.

### DIRECTFLOW™ - PER SEAT

- **One Switchless Pump Motor Per Seat** | Increases efficiency by supplying optimum power and maximum reliability.
- **One Control Per Seat** | Each spa seat occupant has their own individual control.
- **Direct Water Flow** | Water flows directly from the pumps to the jets with no diverters, valves or elbows resulting in maximum output with the minimum of resistance.

### VARIABLE FLOW CONTROL - PER SEAT

- **Rotate to High or Low** | Rotate to "HI" for a full-pressure massage or to "LO" for a more relaxed massage.
- **Wide Range** | Turn the VFC to any massage power, air pressure, or water flow desired, in between low and high.
- **Energy-Efficient** | When the VFC is turned to "LO", the pumps consume 40% less power than a traditional spa pump with diverters.

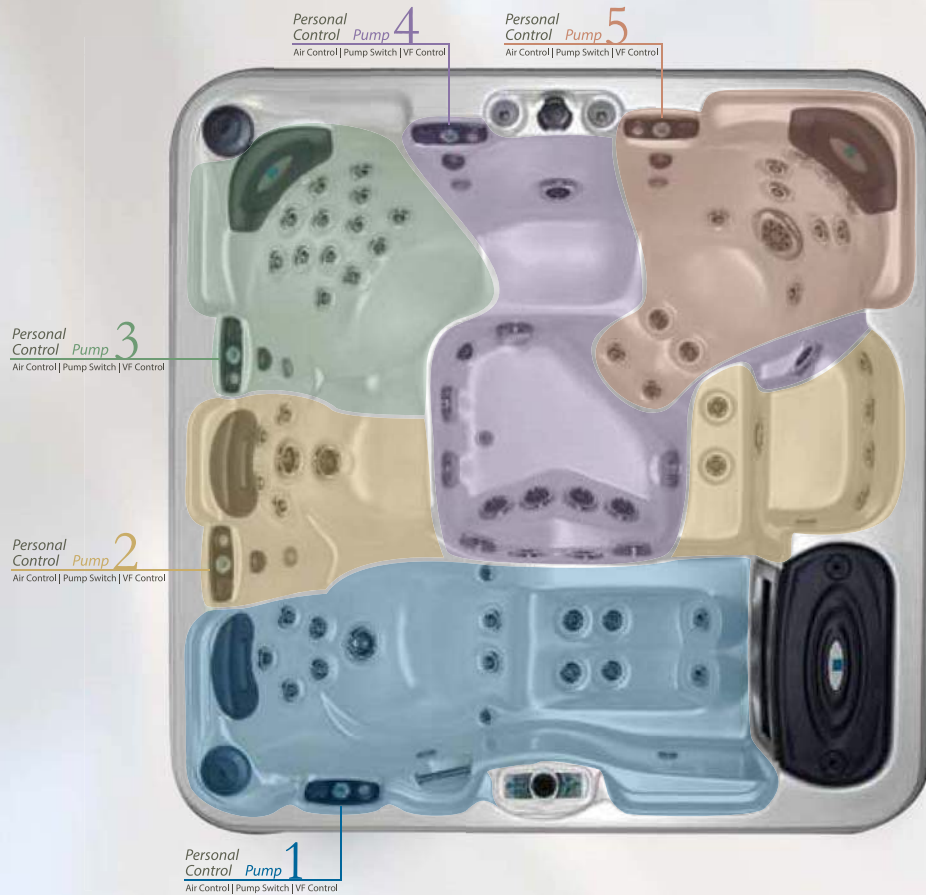

**1 • Air Control •**  
Air Pressure Adjustment

**2 • Pump Switch •**  
Turn Individual Seat Pump On/Off

**3 • Variable Flow Control •**  
High or Low Jet Pressure

# PERSONAL CONTROL FOR EVERY SEAT

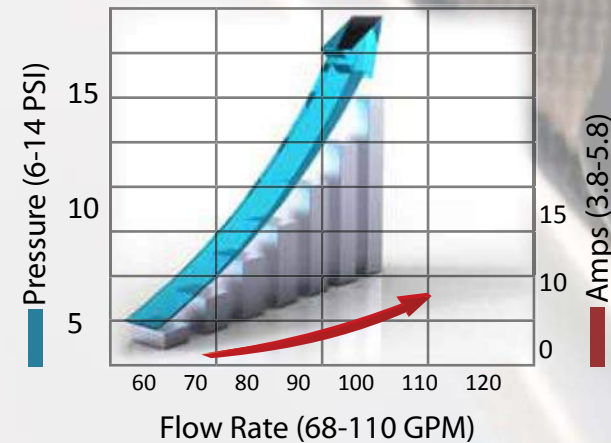

The power of massage can be individually regulated by the sophisticated Platinum Elite design, and by the engineering of individual therapy seat pumps, direct plumbing, and separate control pads.

**No other spa can give you the DIRECTFLOW™ personal control!**

- Multiple Languages:  
English, French, Spanish, German
- Press-and-Hold Button Technology
- Easy Navigation Shortcuts
- Real-Time Clock
- Reminder Messages
- Comprehensive Diagnostics

*\*WiFi receiver purchased separately*

# WIRELESS CONTROL

# PROPURE OZONE

ARTESIAN SPAS  
**ProPure**

## Ozone System

### Advanced Water Purification Mixing Chamber

The secret to this advanced water purification is the combined elements of the **Ozone Generator**, **Mazzei Injector**, the **ProPure™ Mixing Chamber**, and the optional **Nature2**.

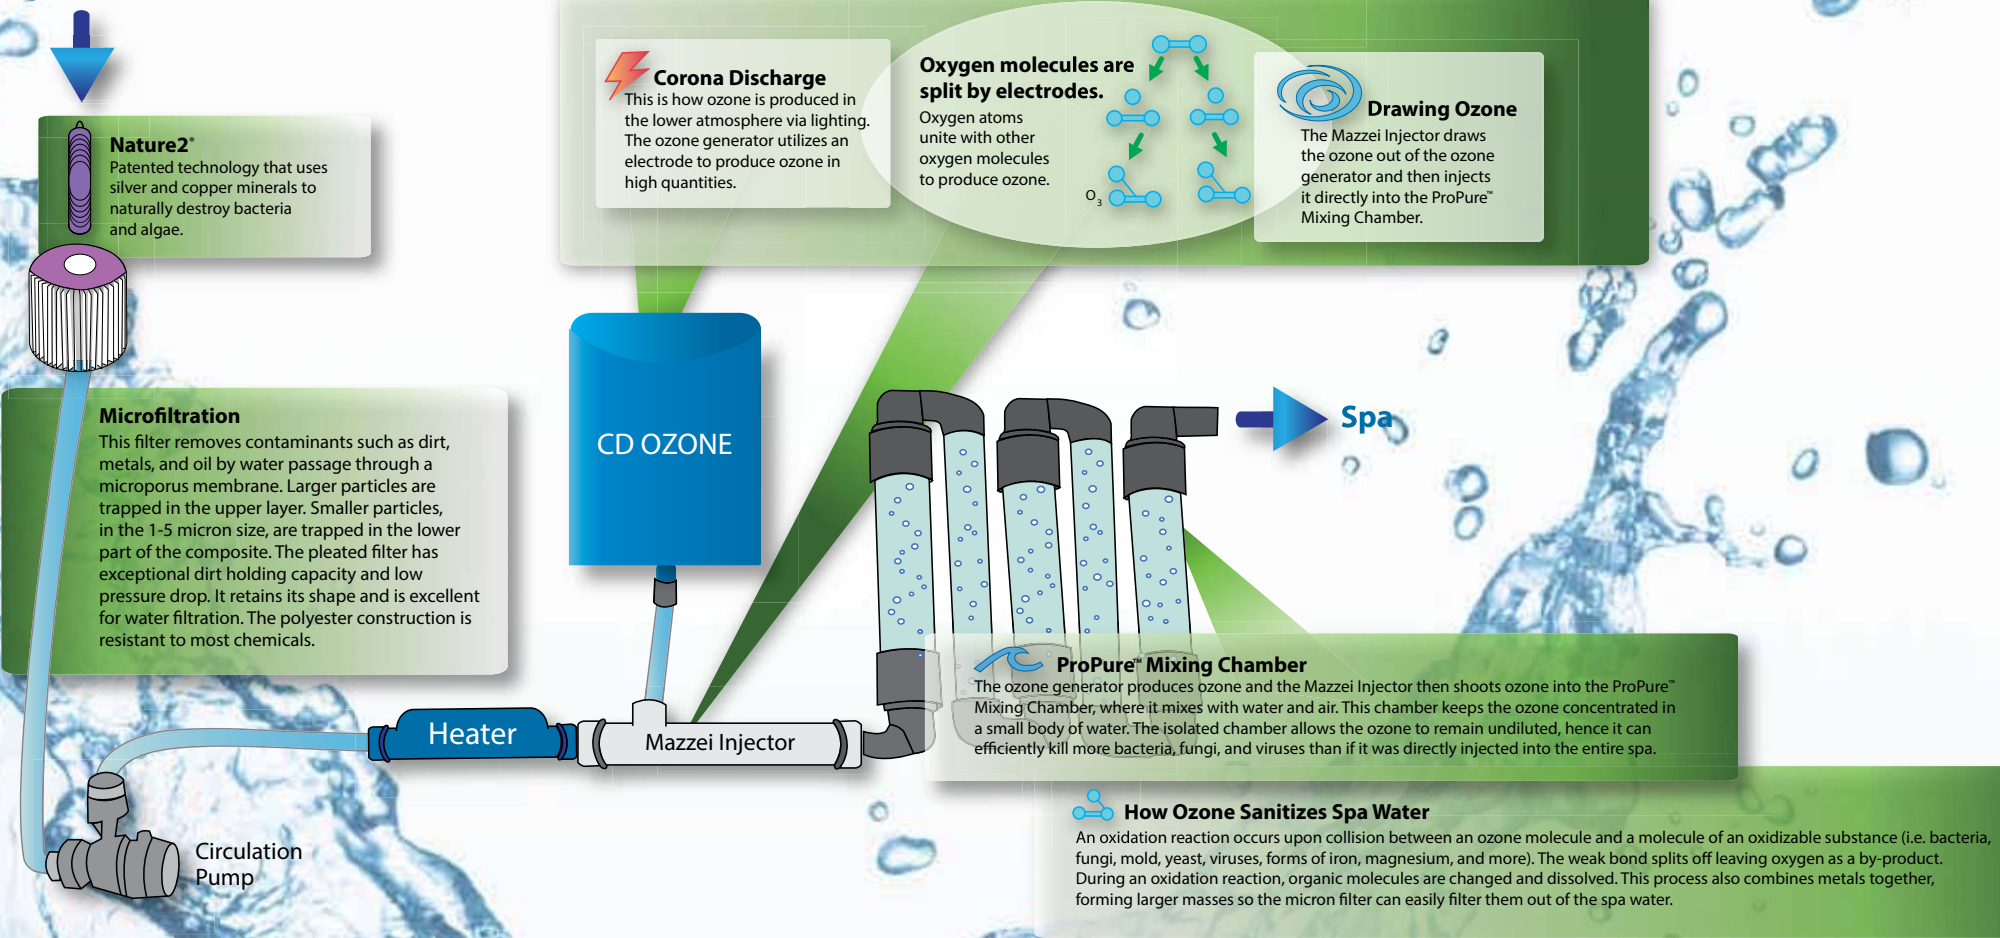

#### How it Works:

1. The Ozone Generator creates ozone.
2. The Mazzei Injector inserts ozone into the mixing chamber, mixing in water.
3. The chamber allows the ozone to remain undiluted for a longer period of time to kill more bacteria, fungi, and viruses than if directly injected into the spa.

## Nature's Way to a Crystal Clean Spa

Artesian Spas introduces a green solution using the combination of Nature2, microfiltration, a circulation pump, and ultraviolet light purification to relieve issues of harsh chemicals, off-gas, irritation, and the need for excessive maintenance. This complete, reinforced sanitation system takes the worry out of spa maintenance with its key components:

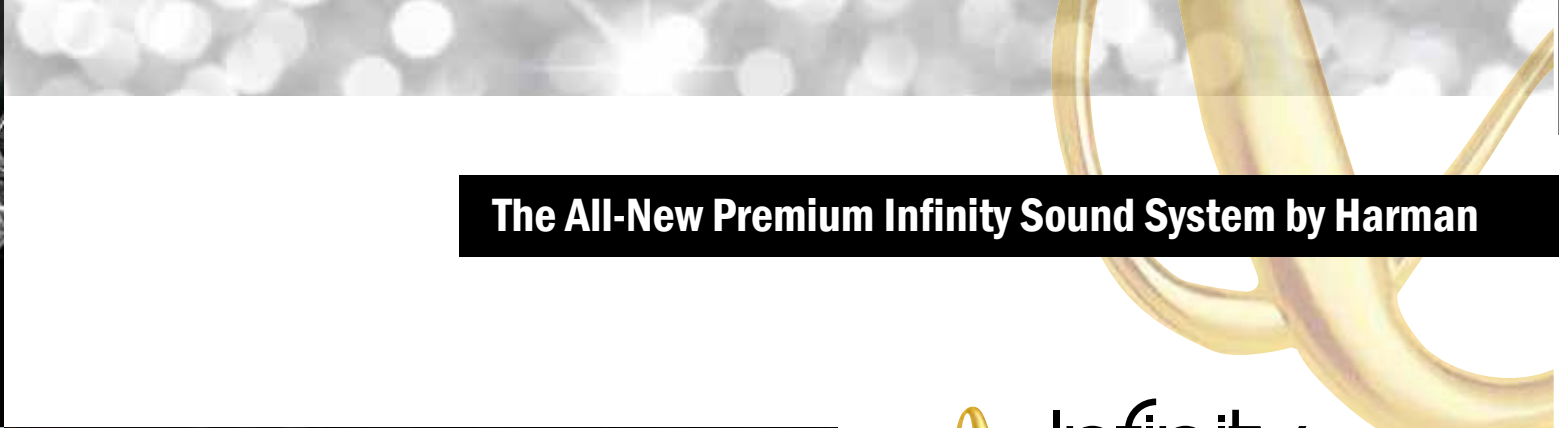

- **Nature2** utilizes silver and copper minerals to naturally destroy bacteria and algae.
- **Microfilters** remove contaminants such as dirt and oils (1-5 microns).
- **Circulation Pump** provides a low operating cost with a high efficiency water circulation pump that filters up to 30 gallons per minute, sanitizing water more than 100 times a day.
- **UVC Unit** produces ultraviolet light inside the quartz chamber using a powerful UVC ray lamp. This lamp produces the optimum wavelength for destroying and eliminating future reproduction of micro-organisms. At 254 nanometers, the system's high germicidal light ray protons combat and destroy viruses, bacteria, algae, yeast, mold, and organisms. Today, this same technology is used in water bottling companies and for hospital equipment sterilization.

## Benefits

- Natural Ultraviolet Light
- Kills 99.5% of Germs
- Effective, Reliable, and Effortless
- Easy Maintenance
- Ideal for Sensitive Skin
- Clean, Safe, Odorless
- UL/CE/EPA Approved

## QUALITY PROTECTION

Every Platinum Elite Spa comes standard with the highest level of insulation and protection possible:

- ASTM Super Deluxe Safety Cover guarantees the highest level of insulation and protection during extreme weather conditions.

- High density Icynene® full foam fills the space between the cabinet and the shell allowing the spa to lock in heat and seal out cool air.

- PermaBase™ ABS Pan is a rigid ABS thermoplastic base pan that is completely waterproof and weather resistant.

South Seas Spas™

## SOUTH SEAS SPAS

### HYDROTHERAPY BENEFITS

### FEATURES

Deluxe and Standard South Seas Spas are as dynamic in quality as they are in efficiency. These spas have an aesthetic appeal and attractive features.

Each moment that you enjoy in a South Seas Spa, can improve your quality of life with hydrotherapy. This

age-old form of healing and stress relief is based on three simple principles: heat, buoyancy and water movement (hydro-massage). Hydrotherapy is an unparalleled method of relieving stress and stress-related conditions, such as high blood pressure, headaches and chronic pain. It benefits every part

of the body, including skeletal, respiratory, circulatory, neuromuscular and the digestive systems.

Choose from many options to enhance your spa such as a pillowfall, stereo and the Advanced Oxidation Process (AOP) water purification.

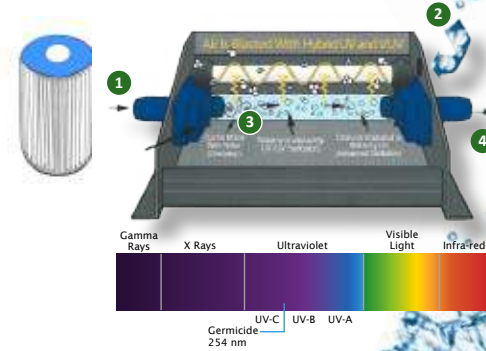

# AOP™

## WATER PURIFICATION

## HOW IT WORKS

- 1 Filtered** water is cycled through the Pump and then enters the **AOP Unit** through the injector, drawing Ozone and Hydroxyls from the chamber. The static mixer combines water, Ozone and Hydroxyls.
- Air enters unit where the **UV Bulb\*** converts it to Ozone and Hydroxyls.
- Water irradiated by **Germicidal UVC** converts ozone to Hydroxyl Radicals through **Advanced Oxidation Processing**. Contaminants are destroyed by intense Germicidal UVC, Ozone, and Hydroxyl Radicals.
- Water exits the unit and flows into the spa resulting in clean and **Purified** spa water.

\* 12,000 hour rated

## FEATURES

- **Warranty**  
Lifetime Structure  
3 - Year Surface  
3 - Year Parts and Plumbing  
3 - Year Electrical  
1 - Year Cabinet
- **Stainless Steel Jets**  
Provides a full-body massage including an ultimate neck massage.
- **ArcticPac Insulation with ABS Bottom**  
This doubled-layered insulation features reflective bubble-foil lining, a coat of Icynene® foam, and a rigid ABS base for ultimate protection.
- **12V Spa Light**  
Illuminates your spa from a central point.
- **Ozone Ready**  
Use of Ozone means that fewer harsh chemicals are needed to keep the spa water clean.
- **Maintenance-Free Kingwood Cabinet**  
Synthetic cabinets weigh less than wood, yet are more resilient and durable. Unlike wood, these cabinets will not crack, chip, warp or rot.
- **50 sq. ft. Filter**  
This pleated, high-density polyester filter provides the ultimate filtration to trap dirt, metals, and oils.
- **4 to 2.5 in. ASTM Deluxe Safety Cover**  
Insulates and protects the spa.

## OPTIONAL FEATURES

- **Full Foam Energy Efficient Package\*\***  
This insulation package features full Icynene® foam along with an insulation blanket to provide the highest insulation value available.
- **Stereo System\***
  - 1) Bluetooth® Music Experience  
- Bluetooth Receiver, 4 Speakers, Subwoofer
  - 2) Aux Input Media Locker  
- 3.5mm input for MP3 devices, 4 Speakers, Subwoofer  
Optional: two 3" patio speakers
- **Pump/Heater Valves**
- **Multicolor 10 LED** (Standard Models Only)  
1-3.5 in. LED Light
- **DynaStar LED**  
1-3.5", 3-2" LED Lights (Standard Feature on Deluxe Models/Optional on Standard)
- **Top Rail Lighting**  
The system includes lighting the top of the spa with small LED lights. (Available with DynaStar, N/A on 617C, 627C, 627M, 518P, 726D, and 743D models)
- **Pillowfall**  
Water pours from the spa pillow gently over your shoulders. Enhance the visual tranquility by adding the LED lighting option. (Pillowfall is Standard Feature on Deluxe Models/Optional on Standard)
- **Advanced Oxidation Process (AOP)**  
This process combines UV Sterilization with Ozone to create purification for clean and clear spa water.
- **Ozonator**  
Water treatment that oxidizes impurities, killing bacteria and enhancing water sanitation and clarity.

\* Not available on 617C, 627C, 627M, 518P, 521L, 532L

\*\* Required for spas in state of CA & CT

## DELUXE CLASS

The most discriminating buyers choose and buy South Seas because of the aesthetic appeal and attractive features not found in other spas. Our Deluxe spa offers several features, the pillowfall,

neck/shoulder jet massager and LED lighting. By choosing other options, such as a stereo system or rail lighting, you can make this spa your own private getaway.

ARTESIAN SPAS™  
EXPERIENCE THE ULTIMATE

Island Spas™

# ADVANCED TECHNOLOGY

## GREEN TECHNOLOGY MEANS ENERGY EFFICIENCY

You can relax knowing that luxury and high performance does not mean increased consumption and higher costs. This line of spas uses an energy-efficient circulation system, along with switchless motors, that delivers high performance and reliability. This makes Island Spas more efficient than any traditionally-built spa in the industry.

### Environmentally Conscious

- Our **maintenance-free, synthetic Kingwood cabinets** do not rust or warp, reducing the need for replacement.
- **High density Icynene® foam** fills the space between the cabinet and the shell providing the highest level of insulation possible.
- Our spa covers upgraded to **ProGuard** offer the best heat retention available.

### Environmentally Friendly Water Treatment

- The **Crystal AOP** option is the natural way to obtain a crystal clean spa. Using a combination of the Nature2 option, Microfiltration, high efficiency Circulation Pump, UVC, Ozone and ProPure™ Mixer, we are able to achieve maximum water clarity while using far fewer chemicals.
- The **Crystal ProPure** option combines the use of the Nature2 option, Ozone Generator, Mazzei Injector, and the ProPure™ Mixing Chamber to concentrate the water purification process.
- Both systems use the **Nature2** option, a silver mineral treatment component that screws directly into the microfilter to naturally destroy bacteria and algae, thus reducing the need for chemicals.

### WhisperPure Circulation System Benefits

- The **WhisperPure Circulation System** circulates water through the microfilters and the heater up to 100 times a day. It delivers clean, regulated water 24 hours a day with a low operating cost.

## HELIX INSPIRED: A New Spin on Spa Jets

The Island Spas line features a revolutionary breakthrough in hydrotherapy jetting that makes use of the timeless concept of a helix, a curve in three-dimensional space such as that found in a spiral staircase. This Artesian Spas patented jet design provides a truly remarkable hydro-massage. Engineered with the concept of the double helix in mind, the jets use a right-directional spiral on the inside of the cylinder. This causes water to spiral out in a twisting motion, providing jet pulsation and heightened massage pressure.

The two largest helix jets, named **ProHelix™**, provide a high volume of water to massage large muscles in the body. The midsize helix jet, called **TheraHelix™**, is strategically placed in the spa in small groups to massage muscles such as the calves, hamstrings, deltoids, biceps, and triceps. The smallest helix jet, the **AccuHelix™**, is placed in large groupings to massage larger regions of the body, such as the entire back. As a complete system, four to five different sizes of helix jets are featured in every Island Spas model.

Bimini Exercise 75 | Acrylic: Silver

# THE ULTIMATE ISLAND SPA

## BIMINI SPA

There is so much to love about owning our largest Island Spas model:

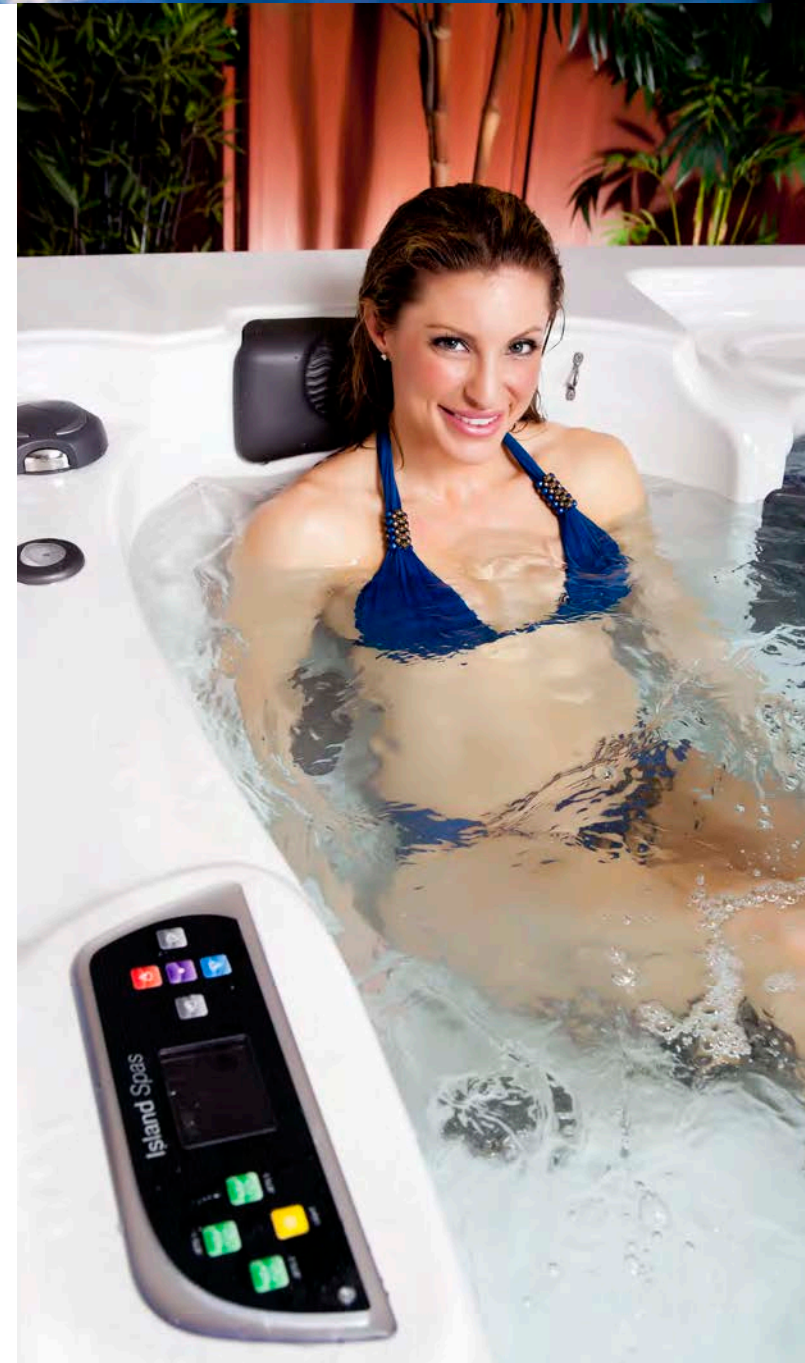

- Two full-body loungers, handcrafted and molded to support your body in a natural position.
- The patented, helix inspired jet design that provides a double spiral jet pulsation for the ultimate massage.
- Multiple air and diverter controls that allow air variation and altered pressure to adjust massage and comfort level.
- Cascade waterfall with LED lighting options that will turn any backyard into an oasis.

## ROWING SEAT OPTION

The rowing seat option offers a smooth, low-impact, and non-load bearing workout. This method of rowing allows an even distribution of exercise by spreading the intensity over three major muscle groups: the torso, legs, and arms; toning and defining without strain. Rowing is also great for aerobic endurance, joint health, increased flexibility, and weight loss.

*\*Spa heat increases heart rate, therefore we recommend exercise routines should be performed at a water temperature between 77F and 82F.*

## WATER PURIFICATION

Ozone + Dynamic Injector + ProPure Mixing Chamber

Crystal ProPure Water Purification combines the **Ozonator**, **Dynamic Injector**, and the **ProPure Mixing Chamber**. All components work together to create **AN INNOVATIVE WATER PURIFICATION SYSTEM**.

## HOW IT WORKS

- 1 The **Nature2** option is a patented technology uses silver and copper minerals to naturally destroy bacteria and algae.
- 2 The **Microfiltration** removes contaminants such as dirt, metals, and oil by water passage through a microporus membrane.
- 3 Water is cycled through the high efficiency **Circulation Pump** filtering water up to 30 gallons per minute.
- 4 **Oxygen Molecules** are split by electrodes and then **Oxygen Atoms** unite with other oxygen molecules to produce high output ozone.
- 5 The ozone generator produces ozone and the Dynamic Injector then shoots ozone into the **ProPure Mixing Chamber**, where it mixes with water and air. This chamber keeps the ozone concentrated in a small body of water. The isolated chamber allows the ozone to remain undiluted, hence it can efficiently kill more bacteria, fungi, and viruses than if it was directly injected into the entire spa.
- 6 Water exits the unit and flows into the spa resulting in clean and **Purified** spa water.

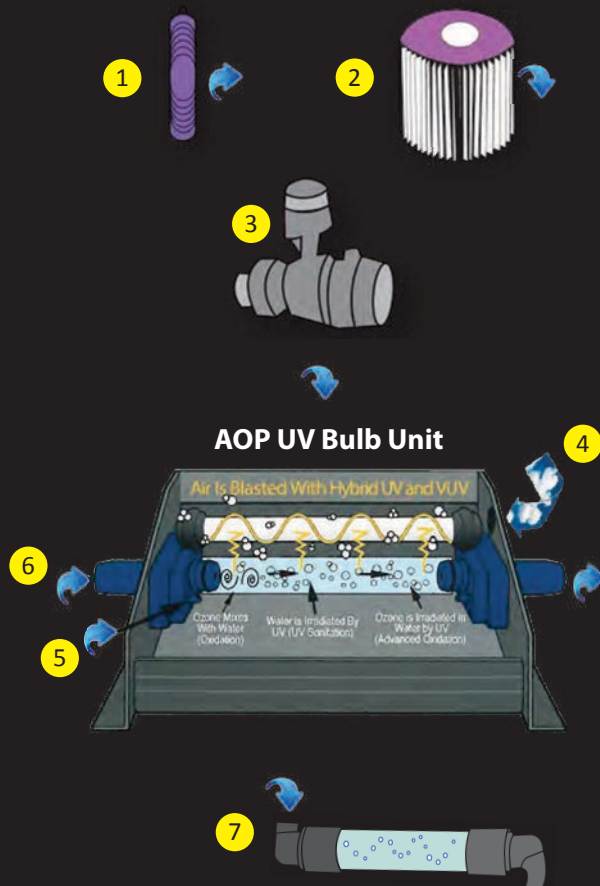

# Crystal AOP™

ProPure Advanced Oxidation

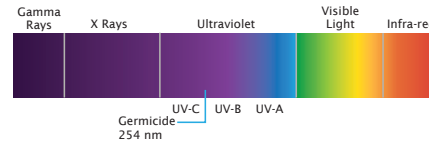

**Natural • Ultra Clean • Peace of Mind**

The Crystal AOP ProPure Advanced Oxidation combines the **Nature2** option, **Microfiltration**, high efficiency **Circulation Pump**, **UVC**, **Ozone** and **ProPure Mixer** to create the ***MOST ADVANCED OXIDATION PROCESS (AOP) FOR WATER PURIFICATION.***

## Advanced WATER PURIFICATION

### UVC + Ozone + ProPure

## HOW IT WORKS

- 1 Spa water enters the optional **Nature2** stick where silver and copper minerals naturally destroy bacteria.
- 2 Contaminants are then trapped in the **Microfilter**.
- 3 Water is cycled through the high efficiency **Circulation Pump** filtering water up to 30 gallons per minute.
- 4 Air enters unit where the **UV Bulb** converts it to Ozone and Hydroxyls. (Bulb rated 20,000 life hours.)
- 5 Water enters the **AOP Unit** through the injector, drawing Ozone and Hydroxyls from the chamber. Static mixer combines water, Ozone and Hydroxyls in a scrambled flow.
- 6 Water irradiated by **Germicidal UVC** converts ozone to Hydroxyl Radicals through **Advance Oxidation Processing**. Contaminants are destroyed by intense Germicidal UVC, Ozone, and Hydroxyl Radicals.
- 7 Water exits the unit to the **ProPure Mixer**, where water and air is mixed to keep ozone concentrated and isolated to maximize purification to produce the purest sanitized spa water possible.

# Revitalize Refresh Restore

SKIN REJUVENATION WITH

# MICROSILK®

## WHY ARE MICRO-BUBBLES EFFECTIVE?

The MicroSilk Option enhances the spa experience by creating a luxury oxygen-rich, micro bubble massage that works double time as a deep cleansing and rejuvenating system.

With a simple push of a button, the tub quickly starts to fill up with micro bubbles that appear as a white cloud. The white appearance comes from the billions of anions in each bubble. Anions are the negative charged particles that create the euphoric feeling similar to those found at the base of a waterfall. It is this bubble releasing of the anions that creates a mist and bubbling effect.

Being that these micro bubbles are smaller in size than pores on the skin, it allows dirt to be swept away by the ultra fine bubbles leaving a smooth and silky feeling and providing the following benefits:

- **Increased Hydration** - Increased oxygen results in cellular respiration
- **Enhanced Skin Cell Growth** - Oxygen improves collagen strength
- **Therapeutic levels of anions** - Shown to reduce scars and reduce skin irritations

CAPTIVA 33

Two 3.0 BHP 1-Speed 6.4A

THE BEAUTY OF MICROSILK® blankets your entire body with billions of oxygen-rich micro bubbles, all the while, giving your skin a luxuriously silky feeling. **MOISTURIZE AND CLEANSE AT THE SAME TIME.** The Micro bubbles enter the pores and lift away any impurities found in the skin, while plumping, hydrating and reducing fine lines and wrinkles. **AN OXYGEN-RICH BATH IS GOOD FOR YOUR HEALTH,** increasing the oxygen levels in the water up to 70%, improving collagen production. **THE POSITIVES OF NEGATIVELY CHARGED IONS,** improves serotonin levels, neutralizing free radicals, while relaxing both the mind and the body.

## Oxygen-Rich Micro Bubble Anions Mist Effect

*"MicroSilk® felt amazing. It made my skin so soft; I continued to feel it for hours afterwards."*

**TidalFit**  
THE EXERCISE POOL

## INNOVATIVE ENGINEERING & ARTISTRY

The TidalFit exercise pool is built to the same world class quality standards that you would expect from May Manufacturing, who are renowned throughout the spa industry. Designed with an ideal combination of innovative engineering and artistry, the TidalFit is as constant in quality as it is in efficiency and design. Some of the most discriminating buyers acquire this exercise pool because it is intuitively user friendly, as well as being aesthetically appealing. Simply put, with its quality workmanship and exceptionally attractive features, the TidalFit is in a class of its own.

## FITNESS & RELAXATION

The TidalFit exercise pool provides a full body workout that improves cardiovascular function, as well as enhancing upper and lower body strength. After a TidalFit workout, you can indulge yourself with the ultimate in relaxation as you enjoy the soothing comfort of the hydrotherapy jets massaging your tired muscles. Standard features, such as a cascading waterfall and underwater lighting, all add to the quality and ambience of this experience. As the industry leader in product design and craftsmanship, May Manufacturing has built the TidalFit exercise pool to deliver significant results in personal fitness, along with outstanding hydrotherapy benefits — all in one package.

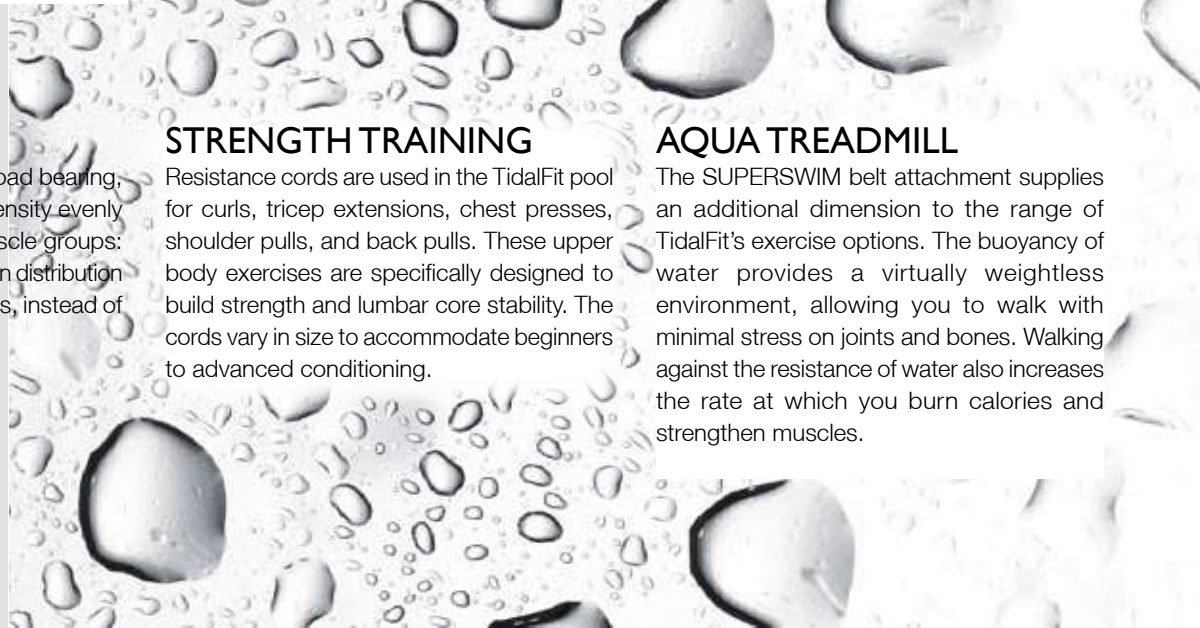

# FITNESS & WELLBEING

The American Heart Association reports that regular physical activity reduces the risk of heart disease and stroke and strengthens the heart, as well as relieving stress. In addition, regular exercise improves blood circulation, keeps joints flexible, and – for people with diabetes – decreases the requirement for insulin. These are just a few of the greatest benefits. Having a regular exercise routine has so many more advantages, such as strengthening the immune system, improving cognitive functions, helping manage weight, and – above all else – enhancing a person's overall wellbeing.

## STRETCHING

The three main goals of exercising are to strengthen muscles, condition the cardiovascular system, and to become overall more flexible. Stretching the muscles before and after a workout is key to prevent injuries and sore muscles that can occur after a strenuous workout. The sidebars in the TidalFit pool make stretching easy and convenient.

## ROWING

Smooth, low-impact, and non-load bearing, rowing spreads the exercise intensity evenly over the body's three major muscle groups: the torso, legs, and arms. This even distribution of exercise helps tone all muscles, instead of just one group.

## STRENGTH TRAINING

Resistance cords are used in the TidalFit pool for curls, tricep extensions, chest presses, shoulder pulls, and back pulls. These upper body exercises are specifically designed to build strength and lumbar core stability. The cords vary in size to accommodate beginners to advanced conditioning.

## AQUA TREADMILL

The SUPERSWIM belt attachment supplies an additional dimension to the range of TidalFit's exercise options. The buoyancy of water provides a virtually weightless environment, allowing you to walk with minimal stress on joints and bones. Walking against the resistance of water also increases the rate at which you burn calories and strengthen muscles.

## SWIM TO A HEALTHIER YOU

Swimming is one of the most inclusive forms of exercise because it is something that people of all ages and all levels of fitness can enjoy. It is considered the perfect exercise because it doesn't put pressure on bones and joints. Also, swimming exercises all major muscle groups, which improves muscle strength and endurance, enhances cardiovascular conditioning, and improves overall flexibility.

TidalFit pools can be equipped with a commercially rated pumping system that produces a current of 400 gallons of water per minute. This pump system is equipped with adjustable swim jets and variable flow controls that allow swimmers of all fitness levels to determine their own desired intensity. Dual and quad adjustable swim jets are available for advanced swimmers or for those who seek a greater challenge.

## ADVANCED SWIM SYSTEM

# SUPERSWIMPRO

The SUPERSWIMPRO system is a highly effective cardiovascular endurance trainer. Simply attach the belt, walk into the water, and begin to swim or walk naturally. As you exercise, the SUPERSWIMPRO will pull back and create tension, allowing you to move against added resistance. This additional tension causes the body to burn more calories and build more muscles than when walking or swimming with only the jets providing the resistance.

## EQUIPMENT INCLUDED

Resistance cords are offered in three lengths

to accommodate different fitness levels. The shortest cord provides greatest resistance, while the longest cord offers least

resistance. The lengths of the cords provide for the needs of the beginner as well as the expert strength trainer. Included with the cords are the rowing bars, handles, and leg strap attachments, to complete your full body workout.

<b>Heater</b>	3.0 kW	<b>Filter</b>	(2) 50 sq. ft.

### \*SEMI IN-GROUND QUAD SWIM JET SYSTEM

- 4 Swim Jets
- 2 Variable Flow Control Swim Pumps
- Direct Flow Hydrotherapy System Required
- Circulation Pump Not Available
- (3) 50 sq. ft. Filter

The Quad Swim Jet System, with or without the Semi In-Ground option, provides four adjustable swim jets for a powerful swim current and can be adjusted to a softer current for beginner swimmers. These swim jets are operated by two commercially rated swimming pool pumps. The variable flow controls allows you to adjust the water flow to any desired speed.

## DUAL BADU® STREAM II JET SYSTEM

### North America, 60 Hz

<b>Size</b>	168 x 91 x 52 in	<b>Volume</b>	1,715 gal
<b>Swim Jet Pump</b>	230V Speck, 4 HP	<b>Weight (Dry)</b>	2,000 lbs
<b>Circulation</b>	0.25 HP	<b>Weight (Full)</b>	21,182 lbs
<b>Heater</b>	5.5/11 kW	<b>Filter</b>	(3) 50 sq. ft.

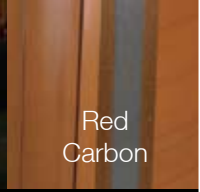

### Export, 50 Hz

<b>Size</b>	427 x 231 x 138 cm	<b>Volume</b>	6,491 lt
<b>Swim Jet Pump</b>	230V Speck, 4 HP	<b>Weight (Dry)</b>	907 kg
<b>Circulation</b>	0.25 HP	<b>Weight (Full)</b>	9,612 kg
<b>Heater</b>	3.0/8.5 kW	<b>Filter</b>	(2) 50 sq. ft.

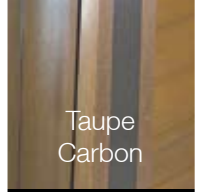

The Dual Badu® Stream II Jet System is powered by two large 4HP, adjustable swim jets. This system is one of the most powerful jet systems available and provides a desired work-out for swimmers of all levels. From intermediate to advanced, the currents can be adjusted to meet the desired resistance.

Caribbean

## OPTIONAL FEATURES

- Water Treadmill
  - Dual Badu Stream Jet System
  - Quad Swim Jet System
  - Semi In-Ground Quad Swim Jet System\*
    - \*Required Direct Flow Hydrotherapy System
- Direct Flow Hydrotherapy System
- DynaBrite Max LED Lighting System
- Aquatic Symphony Stereo - CD/MP3, 4 Speakers, Subwoofer
  - Optional Waterproof iPod/iPhone/MP3 Docking Station
- Aquatic iPod/MP3/FM Locker/Remote with 4 Speakers, Subwoofer
- Wireless Bluetooth Stereo - Receiver, 4 Speakers and Subwoofer
- Aux-Input Stereo with 4 Speakers and Subwoofer
- 2 Flip-Up Speakers
- 4 Patio Speakers
- ProPure Ozone System
- Nature 2 Cartridge
- Plexiglass Panels
- 18" Front Grab Rail

## EQUIPMENT INCLUDED

### SUPERSWIMPRO:

- Aquatic training system

### EXERCISE KIT:

- Rowing Bars
- Resistance Cords, Clips and Handles
- Ankle and Waist straps
- 2 SS 36" Grab Rails

## WARRANTY

- Lifetime Structure
- 7-Year Surface
- 5-Year Electrical
- 5-Year Plumbing
- 2-Year PermaWood Cabinets

## GREEN TECHNOLOGY UPGRADES

**Nature2** - This technology uses silver minerals to destroy bacteria and algae, allowing the user to automatically maintain sanitized water with a reduced need for harsh chemicals.

**ProPure Ozone** - This higher output ozone generator, combined with vortex mixing chambers, creates crystal clear water and requires even fewer chemicals than standard ozone.

## DYNABRITE™ MAX LED LIGHTING UPGRADE

The DynaBrite™ Max LED Lighting System is your invitation to a truly dazzling swim spa experience with your very own customized light show. This unique LED lighting system consists of one main light and twelve underwater lights, each with two-inch lens fixtures that house synchronized light generators. This unique system will create multicolored lighting sequences that enhance the artistic ambiance of your spa's environment.

## MARINE GRADE SOUND SYSTEM UPGRADE

The **Aquatic Symphony Stereo** comes with a CD/MP3 player, sub woofer and a choice of either **four speakers** or **two flip-up speakers**, as well as an optional **Waterproof iPod/iPhone/MP3 Docking Station**. This optional iPod dock allows you to listen to your MP3s, whilst charging your iPod and keeping it safe in a water resistant covering that is located on the side of the cabinet. The **Aquatic iPod/MP3/FM Stereo Locker** with waterproof remote control comes with four speakers and a subwoofer. Also available is the **Auxiliary Input Stereo** that enables you to play your favorite music by plugging in your MP3 via auxiliary cable. Or, simply choose the **Wireless Bluetooth® Stereo** option for superior wireless performance, controlling your stereo from any location within close proximity of your swim spa.

 **Bluetooth®**

*Aquatic iPod/MP3 Stereo Locker*

**Patio Flip-Up Speakers** - Complete your system with exterior speakers that provide an outdoor sound system, even when the swim spa is covered.

## SEMI IN-GROUND UPGRADE

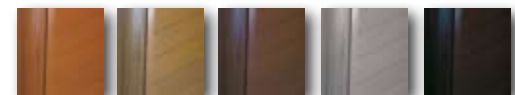

The TidalFit Semi In-Ground option leaves approximately 2-feet of the shell above the ground. This gives you the opportunity to strategically plan your backyard and the placement of your pool for privacy and easy access. Lowering the height also allows more flexibility to landscape around your new exercise pool, creating the ideal surroundings for your complete home fitness swim spa.

## DIRECT FLOW® HYDROTHERAPY SYSTEM UPGRADE

Convert the relaxation and rowing seats to the ultimate in hydrotherapy experiences. The patented DirectFlow® operating system is an innovative, energy saving design that incorporates small, switchless motors, variable flow controls, and electronic on/off pump controls for the optimal massage.

- 14 Helix Jets
- 4.8 BHP Pump
- (1) 50 sq. ft. Filter
