Disclaimer:

- All customised items are non-exchangeable and non-refundable.
- Please allow 4-6 weeks from order confirmation & exact on-site measurement for delivery.
- No changes will be allowed when works had started and no refund will be entertained for abandoned shipment due to such changes.
- Please accommodate with 3mm deviation tolerance due to industrial limitation.

Common Problem 1:

Irregular wall surfaces, pillars, ledges and such imposed a need to construct tiling to accommodate the bathtub.

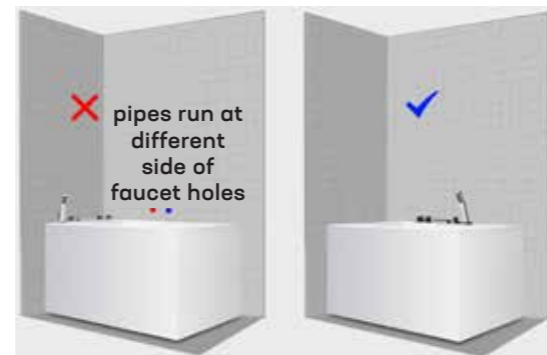

Customisable Bathtub Skirting Eliminates Masonry Works

HERA's bathtub skirting can be customised to fit accordingly to measurement of any protrusions. This eases any future maintenance necessary.

Common Problem 2:

When the existing position of piping is not the same as the bathtub's preset faucet holes. Need to re-run piping to accommodate to the bathtub.

Customisable Position of Faucet Holes Eliminates Re-piping Works

HERA bathtub's position of faucet holes can be customised according to location of pipes.

Common Problem 3:

Needs to run underground piping to floor trap and when floor trap position is not within bathtub area.

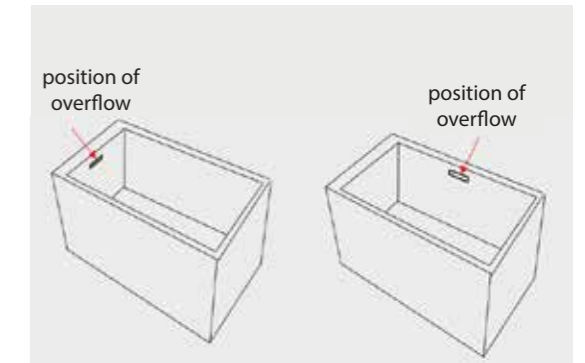

Customisable Hole For Water Outlet Pipe At Desired Position

HERA's bathtub comes with pre-fixed flexible hose water outlet to conveniently plug into the floor trap. Holes can be customised when floor trap position is out of bathtub area.

Common Problem 4:

Need to re-run piping when the bathtub's overflow position clashes with the piping position for faucets.

Customisable Position for Overflow

HERA's bathtub allows customisation to change the preferred side for the position of faucets and overflow to accommodate to the existing piping position.

HERA MINI SERIES

Bathtubs From Just 80cm
Space Requirement

HERA mini-series bathtubs are comparably much lighter than others and comes with a pre-installed water outlet system which makes it portable even if you ever plan to move elsewhere with it without any need for masonry or plumbing! The hard-acrylic body has been proven and tested to withstand heavy load and weather duress.

For those who enjoy soaking at home with essential oils but are not able to do so because of space limitation, HERA bathtubs are a convenient solution for better quality of living.
