

KWC SELECTION KITCHEN

Pure excitement

KWC draws on its long company tradition to ensure that its Swiss quality products make a splash right around the world. Developed and manufactured in Unterkulm in Switzerland's Aargau region, the products are exported to over 50 countries.

Aesthetics

The extraordinarily elegant design of KWC products raises the experience of simply handling water to a new level. These exclusively processed faucets create a refined atmosphere in any kitchen or bathroom.

Functionality

Our many years of experience and the continuous ongoing development of our products give them a unique functionality. We also integrate new technologies to achieve hitherto undreamt of improvements in the way they work.

Ecology

KWC is aware of its environmental responsibilities. We regard the concept of sustainability as a great challenge and incorporate it in everything we do. Thanks to innovative technical features, our products significantly reduce the consumption of water and energy.

KWC is certified in the following areas

ISO 9001 Quality management systems
ISO 14001 Environmental management systems
OHSAS 18001 Occupational health and safety management systems

Swiss quality

KWC is a Swiss company that sets the benchmark worldwide. As a loyal partner, fair play is an important priority and a conscious responsibility. This is why KWC faucets are still designed and manufactured in Unterkulm, Aargau. The commitment to production in Switzerland is a guarantee of the expertise and skill of the workforce, the constant refinement of tried-and-tested technologies and a consistently high-quality product.

Prize-winning design

Numerous awards for its internationally leading designs demonstrate the high regard in which KWC is held across the world.

NOMINIERT

Moving with the times

Just like the fascinating element of water, KWC too is always on the move. Boldness in making changes and a willingness to innovate have characterized the company since its beginnings in 1874.

Innovative technology

KWC faucets make the daily business of handling water a real experience. Every detail is perfect, every movement is right, every function is impressive.

KWC ONO

KWC ONO is a masterpiece of contemporary design: delicately proportioned, made of premium-quality materials, perfectly finished off. Its clear and simple lines give this faucet elegance, grace and strength – so you almost forget how practical, robust and easy to use it is. An artistic creation which adds a touch of subtle distinction to any kitchen.

Simple perfection

KWC ONO stands for sustainability and authenticity. The simplicity of the form becomes a symbol of essential beauty, presented with discreet elegance – and adds a touch of subtlety to any kitchen.

KWC ONO comes in chrome or pure stainless steel. The elegant design and fine finish on the edges and joints will delight you, day after day.

Perfectionism

Graceful yet incredibly robust: the operating lever on the KWC ONO is made of specially hardened stainless steel, as used in medical equipment. The material is resistant to fracturing and corrosion. The lever operates the cartridge directly, guaranteeing maximum precision.

Leadership style

The pull-down aerator on the side-operated lever mixer, with its stylishly curved design, is particularly smart. It fits seamlessly into the spout and pulls out up to 70 cm if required.

Customized

Aerated Neoperl® jet or needle spray? A simple touch of a button – and the water flows in the desired mode.

Character studies

Showing character means expressing individuality. KWC ONO is just one example of a faucet series that is made in various versions for different requirements. Whether it is a top-operated version with a pull-out spray, a pull-out aerator concealed in the elegantly shaped spout or a side-operated model – a good faucet adapts to the demands of its users.

An object of prestige highflex® extended water system

Innovative technology in an ingenious presentation. The characteristic highflex® spring hose, in refined black, brings together style, flexibility and top performance. The high arched hose can be guided in any direction, but when at rest – with or without the spray holder – it retains its shape at all times.

DESIGN **PLUS**

Innovationspreis
Architektur und Technik

Multiple-hole solutions

Multiple-hole solutions are a useful addition to the range, particularly in the semi-professional area. Whether it is a 2-hole solution with the highflex® spring hose and swivel spout (operated from the side) or a 3-hole solution with a lever mixer fitted separately – everything is possible, just as you like, to suit your individual taste.

Performance spectrum

Actuating the lever on the spray automatically switches the integrated vacuum diversion over from spout operation to a needle spray.

KWC ONO touch light **PRO**

Looking to the future. KWC ONO touch light **PRO** is a product concept with a bright future. The aesthetic appeal of clear shapes is expressed in a purist geometric style which characterizes the world of KWC ONO. The only thing that is more beautiful is the idea behind the sophisticated electronics, opening up undreamt-of opportunities to the user.

At your fingertips

The compact operating unit allows the pre-set water temperature and flow rates to be accessed quickly and conveniently. Just tap, and let everything else take care of itself: once for cold (blue), twice for warm (orange) and three times for hot (red). The factory settings can also be changed individually.

Fine-tuning

KWC ONO touch light **PRO**'s operating unit does not just have three pre-set water temperatures and flow rates at its disposal, it also allows individual fine-tuning. A slight turn is enough to get the temperature just right. To adjust the water flow rate, press and turn.

Remote control

The operating unit is also available as a wireless version. Thanks to a magnet, it can be easily removed from the swivel spout head and placed wherever you like in the room.

Flexibility is the principle

The water spout and water mixer are two separate components. You choose the position and alignment of each.

KWC ONO is also available for the bathroom.
